

Night Skies

Cycle 24 Decodable Reader

Have you ever looked up
high into the night sky?

Some nights, you will see
bright stars shining.

Some nights you might
see a moon that looks
like part of a pie.

Have you ever tried
to see the man on the
moon?

Sometimes, you can see
the moon in the daylight.

One night you might see
these bright lights.
And hear them pop!

If you look hard, you
might see the lights of a
plane as it flies by.

If you are really lucky,
you might see a star
shoot through the sky!

What do you think
you will see in the sky
tonight?
